

**METHOD AND SYSTEM FOR PROACTIVELY
REDUCING THE OUTAGE TIME OF A COMPUTER
SYSTEM**

ABSTRACT OF THE DISCLOSURE

- 9 A method (and system) of reducing a time for a computer system to
recover from a degradation of performance in a hardware or a software in at
least one first node of the computer system, includes monitoring a state of the
at least one first node, and based on the monitoring, transferring a state of the
at least one first node to a second node prior to the degradation in performance
14 of the hardware or the software of the at least one first node.
